COMPLIANCE

Industry standards set a minimum level that playground manufacturers must meet. We meet or exceed those standards, because we understand that the ultimate playground offers peace of mind, as well as playful experiences.

AMERICAN SOCIETY FOR TESTING AND MATERIALS (ASTM)

Several key people at GameTime, including our Manager of Compliance and Standards, serve on the ASTM committee that sets the standards for the entire playground industry. GameTime products conform to that standard, ASTM F1487- 07, the Standard Consumer Safety Performance Specification for Playground Equipment for Public Use.

CPSC

The Consumer Product Safety Commission is an independent agency within the United States Federal Government with the authority to inform the public of current product safety performance information and recommended practices. The CPSC first published their guidelines for public playgrounds in 1981 and have updated their publication since then. The current CPSC Handbook for Public Playground Safety, publication #325, is an excellent guide for owners and operators of public play environments.

IPEMA EQUIPMENT CERTIFICATION

GameTime is one of the founding members of IPEMA, and several of our people serve as board members, committee members and chairpersons of the association. In the interest of public playground safety, IPEMA provides a 3rd party certification, to validate conformance to established standards. Our use of the IPEMA seal is your assurance that GameTime has received written validation from an independent lab that the products associated with the seal conform with the ASTM standard, as well as the Canadian CSA standard CAN Z-614. A list of our validated products may be found on the IPEMA website, www.ipema.org.

IPEMA SURFACING CERTIFICATION

GameTime's GT Impax product provides you with the assurance that our surfacing has been certified as compliant to the appropriate ASTM standard. In the interest of public playground safety, IPEMA provides a third party certification to validate a manufacturer's conformance to the ASTM F-1292-99 Standard Specification for Impact Attenuation of Surface Systems Under And Around Playground Equipment. The use of the IPEMA Certification Seal signifies that the manufacturer has received written validation from the independent laboratory that the product associated with the use of the seal conforms with the requirements of ASTM F1292-99. A complete list of our validated products may be found on the IPEMA website at www.ipema.com.

ADA

GameTime is the only manufacturer to have a lab partnership with an Institute for children with special needs, so that we can develop and test our accessible products before bringing them to market. GameTime is the only manufacturer to meet accessibility guidelines on all of its pre-designed PowerScape and PrimeTime playground plans. We also recommend accessible surfacing options. For more information, log on to www.access-board.gov

ISO 9001:2000

GameTime is the first playground manufacturer to obtain the ISO9001:2000 standard. In order to obtain this certification, the company's manuals, policies, objectives and quality procedures are closely examined during a surveillance audit by ISO representatives. Strict attention is paid to policies and procedures in manufacturing, communication channels, system monitoring, customer relations and order processing, which are reviewed for consistency and standards. Companies who meet the standard are awarded the ISO designation.

TUV

An international organization that is a European Union Notified and Competent Body, providing testing and certification. Use of the TUV seal demonstrates that products have passed a comprehensive testing procedure based upon the European Harmonized Standard for Commercial Playground Equipment, and that the GameTime plant is regularly monitored by TUV.

INSURANCE

GameTime has \$51 Million in product liability insurance.

GameTime's per occurrence insurance policy is one of the strongest in the industry. By definition, a Per Occurrence policy provides coverage for an accident that occurred during the term of the policy, even if the policy is subsequently changed or terminated. This is superior to a Claims Made policy, which does not provide such coverage. The certificate pictured is for informational purposes only, and may not be current. A copy of the current certificate is available on request.

A PLAYCORE Company

- Suppliers idled furnaces in 2020, pushing inventories to scarce levels
- 2021 demand returning at a rate faster than supply
- Many suppliers continue facing challenges with ramping up production due to COVID-19 related restrictions
- YOY cost increases exceeding 275%

- Strong exports to Asia in 2020 depleted U.S. inventories
- Continued strength in export market and increased demand in U.S. manufacturing resulting in supply chain difficulty
- YOY cost increases exceeding 65%

- Most active Atlantic hurricane season on record caused suppliers to idle production
- Many suppliers implementing 50% material allocation to primary buyers in attempt to catch up to normal production and inventory levels
- YOY cost increase exceeding 35%

WHAT TO EXPECT AFTER YOUR ORDER WHEN INSTALLATION IS INCLUDED

So that we can meet all your expectations, we have put together this schedule of events that will occur after you place your order. Once your order is received, it is sent to the company headquarters in Fort Payne, AL.

Your order will ship via common carrier approximately 24-45 days after its acceptance into the GameTime system.

Depending on how far from Fort Payne, AL you are located, the order should arrive in 3-10 days after shipment.

Standard installations generally require from 2-10 business days to complete, depending upon the amount and type of equipment, site conditions, weather, and the installer's schedule. Your project site must be completely prepared and ready to receive your equipment before any installation work begins. You will also be responsible for locating and clearly marking all underground utilities in the installation area. Additionally, you will need to acquire any and all required permits prior to the installation. Unless other arrangements have been made, security of the site during construction, if required, will be your responsibility.

Non- standard installations can include excavation, site work, extra/additional machinery for rock excavation, limited access sites, utility obstacles, etc. These typically require more time and are an additional cost.

Once work is completed you will be notified and all responsibility of any new work and maintenance will be transferred to you.

PRIMETIME

The standard in affordable play systems.

MAXIMUM PLAY VALUE

- 3.5" diameter uprights available in aluminum or galvanized steel
- Choose from an extensive offering of play components and signature products
- Lifetime limited warranty on uprights, posts and hardware
- Direct Bolt™ connections with less hardware for easier construction and maintenance
- Slip-resistant TuffClad® deck coatings for improved footing
- Entry archways to help direct traffic and prevent inadvertent falls
- Tough, baked-on powder coat finish
- Combine with Xscape systems to create a fitness-inspired hybrid system
- IPEMA certified to ASTM standards

THE PRIMETIME ADVANTAGE

PrimeTime systems offer the most flexibility and cost savings for schools, churches and daycares.

- Wide range of slides, climbers and interactive activities that promote fun and fitness
- Direct Bolt connection offers sleeker lines and cleaner designs
- Smaller footprint requires less surfacing, reducing the total cost of installation
- Highly configurable to meet the developmental needs and play styles of children of all ages

ENGINEERED WOOD FIBER

An affordable natural surfacing choice that meets accessibility guidelines.

DESCRIPTION

Engineered Wood Fiber (EWF) from GT Impax is a popular choice for projects with initial budget constraints. Routine maintenance is required for continued compliance. Providing adequate drainage is an important preventative measure, because wet engineered wood fiber may freeze in sudden climate changes. GT Impax EWF is non-toxic, and does not contain paint, chemicals, or additives. It contains minimal bark, and is free of twigs, leaf debris, and other organic materials.

BASIC SPECIFICATIONS

Product is manufactured of size controlled softwoods and/or hardwoods which average 1"-2" in length and contain a maximum of 15% fines to aid in compaction. Engineered Wood Fiber can be installed over bare earth when Geotextile Fabric is used to enhance drainage.

This product meets all applicable ASTM standards. For more information, please refer to our complete product specification.

AT A GLANCE

Maintenance: High

Access: Mid

Warranty: 15/25 years

Color Options: N/A

BENEFITS

- Engineered wood fiber gives your playground an attractive, natural look
- Economical initial cost
- Loose fill materials aid in the protection of children who experience lateral falls

TIPS

- Use GT Impax wear mats to reduce displacement in "kick out" areas, raking is required to maintain compliant depths
- As with all loose fill surfaces containment systems like our playcurbs will reduce the spread of surfacing to non-play areas
- Install GT Impax drainage systems to prevent freezing or puddling

Surf's Up

Play Value! PrimeTime is the choice of schools, childcare centers and communities who want to maximize value and create play spaces that provide fun and challenging activities along a developmental continuum. The small footprint of PrimeTime reduces cost, and a wide range of play components provide the maximum amount of play opportunities.
